

#210
Fork Lift

Safety Refresher

Dates & Time:
September 9, 2005
1:00 – 4:00
Location:
Marshall Space Flight Center

This course provides 3 classroom hours of training followed by a written exam. The basis for the course is OSHA 29 CFR 1910.178 (l). Discussions include the awareness of hazards and how to gain from lessons learned. Other topics include the mechanics and components of a fork truck, inspections and maintenance, safest driving and traffic rules, special operating rules, stacking and tiering, and emergency procedures and refueling.

Who should take this course:

- Supervisors over forklift operations
- Forklift operators
- Safety Personnel

About the Instructor:

Tim Evans, has spent 25 years in the Pulp & Paper Industry with experience in quality, training, safety, forecasting, advising, and planning. Certified in the following: Crane Training Instructor, Scaffold Instructor, Fall Protection Instructor, Forklift Operators Instructor, Department of Transportation in Hazardous Chemicals, Ergonomics Specialist, DACUM Facilitator, ISO 9000 Coordinator, Self Directed Team Development, and TQM Systems. Mr. Evans is Certified by OSHA to teach General Industry and Construction classes. In 2004, he earned his dual General Industry and Construction, Certified Safety & Health Official (CSHO) certificate.
