

## NSTC 0850 BASIC FIRST AID

This class is designed to help participants become familiar with how to recognize and care for victims of illness and sudden injuries. Students will be able to recognize an injury or sudden illness. They will learn how to care for muscle, bone and joint injuries, control bleeding and learn general care steps for burns. The course also includes some emergency response techniques to help people feel more confident of their ability to help in an emergency.

No CEUs available for this course

### Target Audience:

Anyone with an interest in or need for accomplishing Basic First Aid.

### Dates:

January 25, 26, & 27, 2005  
8:00 – 11:00
