

Safety  
Course

# NSTC 806, Confined Space Entry

The purpose of this course is to provide employees with the standards, procedures, and requirements necessary for safe entry to and operations in confined spaces. OSHA standard 29 CFR 1910.146, "Confined Space," is the basis for this course. The course covers the hazards of working in or around a confined space and the precautions you should take to control these hazards. This course will primarily be presented via the NASA Videoteleconferencing system and the instructor-led version of this class will only be available if combined with another course by the same instructor, if there are enough students to merit multiple presentations, or to meet special, urgent needs. Check with the NSTC management staff for determination. This course is also given as module during the Cryogenics Safety class during which attendance is open (on a space-available basis) to non-class students.

**Target Audience:**

- Supervisors and employees required to work in confined spaces.
- Safety professionals
- Facility managers of facilities containing confined spaces.

No CEUs available

**Dates:**
